🔗 EXPERIENCE

Boeing India Bengaluru : Software Engineering Intern

05/2024 – 07/2024

- Developed an in-house real time Virtual Machines management dashboard, for internal users.
- Utilized ReactJS and MaterialUI for the front-end development, ensuring a user-friendly interface.
- Implemented GraphQL with Apollo Client and Hasura for efficient data fetching and real-time updates.
- Collaborated with cross-functional teams in Agile Scrum to integrate dashboard features, ensuring iterative development.

📁 PROJECTS

Job Portal, <https://auth-job-portal-bm9avan.vercel.app/> [🔗](#)

TECHSTACK: React.js, Node.js, SQL, Bcrypt .js

Job Portal is a React-based college job portal with a Node.js and MySQL backend. Admins can post jobs, view student profiles, download applicant Excel sheets, and generate posters for selected students. Students can apply for jobs, view company details, and use integrated AI for interview-related queries.

Chat App, <https://chat-app-bmpavan.vercel.app/> [🔗](#)

TECHSTACK: Next.js, WebSocket, Typescript, Redis, NextAuth

Chat App is a real-time messaging application built with WebSocket in Next.js. Users can communicate with each other in real time. Upstash Redis is used for data storage, while NextAuth provides secure authentication and session management.

Our Bank, <https://our-bank-bm9avan.vercel.app/> [🔗](#)

TECHSTACK: React.js, React Router, MongoDB, react-i18next

Our_Bank Website is a bilingual (Kannada and English) platform that offers comprehensive bank information and detailed loan fee insights. Crafted using React, React Router, and react-i18next for an interactive and user-friendly experience.

🧠 SKILLS

- | | | |
|--------------|-----------|------------|
