Projects

Teachers Feed Back form ⊡
using Java
Developed a Teachers Feedback Form project, enabling anonymous student feedback for improved teaching quality. Designed a user-friendly web interface, implemented secure data collection, and conducted data analysis. Utilized Java and Swing to create a Teachers Feedback Form project, enhancing the user interface and interactivity of the feedback system.

Job Portal
Developed a user-friendly web application using React.js to enable job seekers to find available jobs and employers to post job openings. Leveraged MongoDB for efficient storage and management of job data.

URL Shortner
with Authentication and Authorisation
Developed a secure and scalable URL shortening service with built-in authentication and authorization . The project aimed to provide users with a convenient method to shorten URLs while ensuring data privacy and access control through robust user authentication and authorization mechanisms.

Certificates

- Java
- Python Basics ⊡
